

EKENE NDUBUEZE

Software Developer

Ottawa, ON | Open to Remote & Relocation across Canada
ekene.ndubueze@gmail.com | (514) 608-8765 | ekenendubueze.com | [GitHub](#) | [LinkedIn](#)

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, Java, Kotlin, SQL
Frontend	React, HTML5, CSS3, Tailwind CSS, Responsive Design, Component Architecture
Backend & APIs	Node.js, Python (FastAPI), REST API Design, API Integration, Data Validation, Error Handling
Databases	PostgreSQL, MySQL, MongoDB, Schema Design, SQL Queries, Query Optimization
AI Integration	OpenAI API, Google ML Kit, Prompt Engineering, AI Workflow Design, LLM API Integration
Tools	Git, GitHub, npm, Linux CLI, Docker (familiar), AWS (in progress), Postman, VS Code, Jira, Confluence
Practices	Agile/Scrum, Code Reviews, Technical Documentation, Cross-Functional Collaboration, Debugging

PROJECTS

stackgen — CLI Developer Tool | [Published on npm](#)

TypeScript, Node.js, Commander.js, Inquirer.js

- Designed and published a Node.js CLI tool to npm (@ozi-tech/stackgen) that scaffolds full-stack project boilerplates, reducing project setup from 30+ minutes to under 60 seconds.
- Supports 9 stack combinations (React/Vue × Express/FastAPI × PostgreSQL/MongoDB) with auto-generated Docker, Git, environment config, and documentation.

AI-Powered Portfolio Chatbot — LLM Integration

React, Tailwind CSS, OpenAI API (GPT-4o-mini), Vercel Serverless Functions

- Built an AI chatbot integrated into a React portfolio site using the OpenAI API. Engineered system prompt from structured data, implemented server-side API proxying via serverless function with rate limiting.
- Deployed to Vercel with custom domain, environment variable management, and secure API key handling.

LabelXtract OCR — AI-Powered Mobile App for Canada Post

Kotlin, Google ML Kit, CameraX, REST APIs, Android SDK, Material Design

- Built end-to-end AI pipeline: camera input → ML model inference → structured data extraction → API submission with validation, retry logic, and fallback handling. Achieved 95%+ accuracy.
- Reduced failed API calls by 82% through systematic debugging and client-side validation across multiple device configurations.

Pet Adoption Platform — Full-Stack Web Application

React, JavaScript, Python/FastAPI, MongoDB, REST APIs, Axios

- Built full-stack application with React frontend and Python/FastAPI backend. Implemented 12 REST API endpoints with data validation, error handling, and consistent response formats.
- Designed MongoDB schema, optimized queries across 500+ records, and managed Git workflows with feature branches, PRs, and code reviews. Achieved 99.2% uptime.

EXPERIENCE

Technical Product Manager | Mara Cryptocurrency Wallet

Lagos, Nigeria | Mar 2022 – Feb 2023 | FinTech platform serving 50,000+ users

- Collaborated with an 8-person engineering team across 12 production releases in Agile sprints. Participated in code reviews, sprint planning, and retrospectives.
- Debugged production issues by analyzing stack traces, logs, and database queries. Reduced post-release defects by 35% and incident resolution time by 33%.
- Conducted deep SQL analysis that uncovered \$1.2M in fraudulent activity across user accounts.
- Produced 15+ pages of technical documentation (architecture, APIs, troubleshooting). Reduced support escalations by 40%.

EDUCATION

Diploma in Computer Programming | CGPA: 3.97 / 4.0

Algonquin College, School of Advanced Technology | Ottawa, ON | Sep 2023 – Jun 2025

Dean's List: 4 consecutive semesters

Coursework: OOP (Java), Data Structures & Algorithms, Database Design & SQL, Web Development, Mobile Development, Software Architecture

ADDITIONAL

- AWS Cloud Practitioner certification in progress.
- Peer Mentor — Algonquin College International Education Centre (2024–2025). Led weekly programming sessions for international students.
- All projects with source code available at github.com/Ozi-Tech
